

Multi-Format Parser Agent Test Document

Overview

This is a PDF document created to test the multi-format parser agent's PDF parsing capabilities. The parser should be able to extract text from multiple pages, read metadata, and handle various formatting elements including tables, lists, and styled text.

Key Features Being Tested

- Multi-page text extraction
- Metadata reading (title, author, subject)
- Table content extraction
- Formatted text handling
- Special characters and symbols: àáâãäå çèéê ñ ü

Sample Data Table

Format	Extension	Status
PDF	.pdf	✓ Implemented
DOCX	.docx	✓ Implemented
CSV	.csv	✓ Implemented
XLSX	.xlsx	✓ Implemented
JSON	.json	✓ Implemented
Markdown	.md	✓ Implemented
Text	.txt	✓ Implemented

Page 2: Additional Content

This is the second page of the test PDF document. The multi-format parser should be able to extract text from all pages and combine them appropriately.

Technical Specifications

Document Type: Test PDF

Created: 2025-11-17

Purpose: Testing PDF parsing capabilities

Pages: 2

Encoding: UTF-8

Framework: Agno AI

Conclusion

This PDF document tests various PDF parsing features including multi-page extraction, table handling, formatted text, and metadata reading. The parser should successfully extract all content and present it in a structured, readable format.
